

DESCRIPTION OF TECNET AC/DC INVERTER FAN

Beat the Heat and power outages with Unmatched Reliability!

Upgrade your comfort with a high-performance **AC/DC INVERTER Standing Fan** (Non-Rechargeable) built to deliver maximum airflow, charging and lighting solution when you need it most. The TECNET **STT-N18B** is purposely built for long-lasting durability and heavy-duty cooling.

This 18-inch non-rechargeable standing fan features low power consumption, making it ideal for use with inverters. By maximizing your battery backup time and prolonging battery lifespan, it helps you cut down on electricity bills and green energy costs while keeping you completely comfortable.

It comes with DC bulbs to light up your home and avoid darkness. Its 5- speed combines raw power with smooth, whisper-quiet operation. Wide-angle oscillation for full room coverage with an adjustable height pole to direct airflow exactly where you want it, making it the perfect addition to any home, office, shop, or large living space.

In addition, it features strong aluminum blades, a durable iron body, and exceptional reliability—backed by a **12-month warranty and comprehensive after-sales support with readily available replacement parts and accessories.**

WHY CHOOSE THE TECNET STT-N18B INVERTER FAN

- **DC Brushless Motor:** Powerful 100% copper DC brushless motor engineered to push heavy, cool air across the rooms effortlessly.
- **Strong Blades:** Rugged aluminum highly efficient four blades,
- **USB Charging Port:** Keep your smart phone or tablet powered up using the integrated USB 5V charger and for powering follow come USB night light
- **12 Volts DC Port:** For powering of DC bulbs, Camera and other 12V operated devices
- **Lighting Bulbs:** Includes 2 USB bulbs and a 5watts DC bulb use to light up your home and avoid darkness making it the perfect companion for camping trips or emergency source of light.
- **Input Voltage:** Features a wide DC 12-24V input range for versatility and solar panel compatibility
